

End caps

FLX-CS-PVC/FLX-CF-PVC**Description**

The FLX-CS-PVC end cap is used for plugging the ends of FLX-HDPE and FLX-HDPE-A ducts, e.g. when installing ducting on the construction site - they effectively protect against contamination of the interior of the ducts. At the same time, FLX-CS-PVC end cap is also used to plug unused connection spigots in plenum boxes and FLX-PLO distribution boxes (but they are not inserted inside the spigot, but onto it).

FLX-CF-PVC end caps are used for plugging unused connection spigots in plenum boxes and FLX-PRO distribution boxes. The end caps are made of PVC.
